**At the disposal of the lawyer and the publication "Notebook" came across a video with shocking footage from the morgue.**

Well-known human rights activist and lawyer Ekaterina Gordon shared with the editors of Notepad a shocking video from an unknown mortuary. On the footage of the recording, which for ethical reasons had to be heavily “covered up” - the bodies of the dead. The editors counted only 33 corpses. All bodies are in a terrible state.

The location where the recording was made has not been established. However, the author assures that it was produced on the territory of the Russian Federation.

– At the entrance to the morgue, as well as in its distant rooms, on the couches and on the floor, a large number of bodies of dead people are randomly located, next to which are the internal organs. Cadaverous phenomena on these bodies indicate that they lie for a long time. The faces and bodies of the dead are deformed, the whole room is stained with blood and other biological materials, Gordon describes the footage he saw..

Also in the video there are people wearing "anti-plague" suits. Probably, these are the employees of the morgue - doctors, pathologists, orderlies. Those present on the video are talking among themselves, a voice sounds behind the scenes: “Show me Polochkin».

– We and the Internet community are concerned about the presence of such facts in our medical institutions, the immoral attitude of the medical staff towards the bodies of dead people, ”Gordon says and demands that the Investigative Committee deal with what is happening on the video and punish the perpetrators. - Based on the above, we believe that the actions of medical workers (pathologists, forensic experts, other officials) may contain signs of crimes under Art. 293 of the Criminal Code of the Russian Federation (Negligence), 244 of the Criminal Code of the Russian Federation (Desecration of the bodies of the dead). We ask you to conduct a pre-investigation check on the facts set forth in the application, to initiate a criminal case.

An application to the Investigative Committee signed by Ekaterina Gordon and the editor-in-chief of Bloknot.ru Dmitry Noskov was sent to the head of the department, General of Justice Alexander Bastrykin.
